

PRJOECT: For my final project, I’m going to build a website directory for the cycling community in LA to make bike meet-ups and nearby bike shops easier to find.

Cyclist will be able to :

- Select a type of group ride based on their mood
- Find a local bike shop in their area by inputing their address
- Stay in touch with contact links and links to meetup sites

Technical Notes:

- Single-page site with JQuery incorporated
- Formatted to look good on various screens with the use of CSS

DESKTOP VERSION

LOGO

ABOUT

TYPES OF RIDES

NEARBY  
BIKE SHOPS

CONTACT

**Functionality:**

- header remainsfixed
- drop down menus upon clicking each nav
- external links to email & social media

**Implementation:**

- JQuery & CSS

WHAT’S YOUR  
BIKE MOOD?

SOCIAL

SHY

ANGRY

Introverted

**Functionality:**

- Allow users to click on a mood and and pop up window with image & external link will appear.
- A pop up window with an address input box and embedded map will appear under introverted

**Design:**

- Background images for each mood with rounded edges
- with clickable button on top

**Implementation:**

- JQuery to allow pop up windows of external meetup sites w/photos will appear on the same pg upon clicking each mood
